SEDIMENTOLOGY

The Journal of the International Association of Sedimentologists
edited by J. E. Andrews, B. G. Jones and A. G. Plint

Volume 42 1995

Blackwell
Science

Contents

NUMBER 1

1 Statement by Incoming Editors
3 *John F. Aitken and Stephen S. Flint.* The application of high-resolution sequence stratigraphy to fluvial systems: a case study from the Upper Carboniferous Breathitt Group, eastern Kentucky, USA
31 *Klaus H. Michels.* The decomposition of polymodal settling velocity distributions for a comprehensive sedimentological description of sand-sized samples
39 *Richard R. McDonald and Robert S. Anderson.* Experimental verification of aeolian saltation and lee side deposition models
57 *Reto M. Burkhalter.* Ooidal ironstones and ferruginous microbialites: origin and relation to sequence stratigraphy (Aalenian and Bajocian Swiss Jura mountains)
75 *Marc Aurell, Dan Bosence and Dave Waltham.* Carbonate ramp depositional systems from a late Jurassic epeiric platform (Iberian Basin, Spain): a combined computer modelling and outcrop analysis
95 *Denis Lavoie.* A Late Ordovician high-energy temperate-water carbonate ramp, southern Quebec, Canada: implications for Late Ordovician oceanography
117 *Sean J. Bennett and John S. Bridge.* An experimental study of flow, bedload transport and bed topography under conditions of erosion and deposition and comparison with theoretical models
147 *Anver Ayalon and Fred J. Longstaffe.* Stable isotope evidence for the origin of diagenetic carbonate minerals from the Lower Jurassic Inmar Formation, southern Israel
161 *J. L. McKay, F. J. Longstaffe and A. G. Plint.* Early diagenesis and its relationship to depositional environment and relative sea-level fluctuations (Upper Cretaceous Marshybank Formation, Alberta and British Columbia)
161 Citation of John R. L. Allen for the Sorby Medal
192 Professor Allen's acceptance speech
193 Report of the General Secretary
194 Report of the Treasurer
196 Report of the Editors
198 Forthcoming papers

NUMBER 2

199 *S. Zeeh, T. Bechstädt, J. McKenzie and D. K. Richter.* Diagenetic evolution of the Carnian Wetterstein platforms of the Eastern Alps
223 *Patricia A. McCrory.* Evolution of a trench-slope basin within the Cascadia subduction margin: the Neogene Humboldt Basin, California
249 *Stelios Nicolaides.* Origin and modification of Cambrian dolomites (Red Heart Dolomite and Arthur Creek Formation), Georgina Basin, central Australia
267 *Jean Marie Rouchy, Catherine Pierre and Frederic Sommer.* Deep-water resedimentation of anhydrite and gypsum deposits in the Middle Miocene (Belayim Formation) of the Red Sea, Egypt
283 *U. C. Kothyari.* Frequency distribution of river bed materials
293 *S. S. Chun and S. K. Chough.* The Cretaceous Uhangri Formation, SW Korea: lacustrine margin facies
323 *F. Surlyk, L. Arndorff, N.-E. Hamann, L. Hamberg, P. N. Johannessen, E. B. Koppelhus, L. H. Nielsen, N. Noe-Nygaard, G. K. Pedersen and H. I. Petersen.* High-resolution sequence stratigraphy of a Hettangian–Sinemurian paralic succession, Bornholm, Denmark
355 *D. Marc Audet.* Modelling of porosity evolution and mechanical compaction of calcareous sediments

DISCUSSIONS/REPLIES

375 *Simon K. Haslett.* Origin of quartz cements in some sandstones from the Jurassic of the Inner Moray Firth (UK)
376 *Grete Block Vagle, Andrew Hurst and Henning Dypvik.* Reply
379 *Andrew D. Miall.* Description and interpretation of fluvial deposits: a critical perspective
384 *John S. Bridge.* Reply
390 Forthcoming papers

NUMBER 3

391 *Dirk Goossens.* Field experiments of aeolian dust accumulation on rock fragment substrata
403 *W. G. Nickling and C. McKenna Neuman.* Development of deflation lag surfaces
415 *Luis Alberto Buatois and Maria Gabriela Mángano.* Sedimentary dynamics and evolutionary history of a Late Carboniferous Gondwanic lake in north-western Argentina
437 *M. E. Sanz, A. M. Alonso Zarza and J. P. Calvo.* Carbonate pond deposits related to semi-arid alluvial systems: examples from the Tertiary Madrid Basin, Spain
453 *W. Brian Dade and Herbert E. Huppert.* A box model for non-entraining, suspension-driven gravity surges on horizontal surfaces
473 *E. Juhász, L. Korpás and A. Balog.* Two hundred million years of karst history, Dachstein Limestone, Hungary
491 *S. J. Bennett and J. L. Best.* Mean flow and turbulence structure over fixed, two-dimensional dunes: implications for sediment transport and bedform stability
515 *Peter-Jost Spies, Ian K. McEwan and Graeme R. Butterfield.* On wind velocity profile measurements taken in wind tunnels with saltating grains

DISCUSSIONS/REPLIES

523 *Thomas Pletsch and Martin Meschede.* A coarse-grained turbidite system with morphotectonic control (Middle Albian, Ondarroa, northern Iberia)
525 *L. M. Agirrezabala and J. García Mondéjar.* Reply
531 *Terence C. Blair and John G. McPherson.* Quaternary alluvial fans in southwestern Crete: sedimentation processes and geomorphic evolution
535 *W. Nemec and G. Postma.* Reply
550 Forthcoming papers

NUMBER 4

581 *Donatella Mellere and Ronald J. Steel.* Facies architecture and sequentiality of nearshore and 'shelf' sandbodies: Haystack Mountains Formation, Wyoming, USA

575 *Gideon Almagor and Bettina Schilman.* Sedimentary structures and sediment transport across the continental slope of Israel from piston core studies
593 *P. Larcombe and P. V. Ridd.* Megaripple dynamics and sediment transport in a mesotidal mangrove creek: implications for palaeoflow reconstructions
607 *Benjamin C. Kneller and Michael J. Branney.* Sustained high-density turbidity currents and the deposition of thick massive sands
617 *P. Bellotti, S. Milli, P. Tortora and P. Valeri.* Physical stratigraphy and sedimentology of the Late Pleistocene–Holocene Tiber Delta depositional sequence
635 *M. C. Thomas, R. J. Wiltshire and A. T. Williams.* The use of Fourier descriptors in the classification of particle shape
647 *A. Marshall McCabe and Colm O'Cofaigh.* Late Pleistocene morainal bank facies at Greystones, eastern Ireland: an example of sedimentation during ice marginal re-equilibration in an isostatically depressed basin
665 *Orsolya Szatanó and Poppe L. de Boer.* Basin dimensions and morphology as controls on amplification of tidal motions (the Early Miocene North Hungarian Bay)
683 *Long Li and Lawrence W. Martz.* Aerodynamic dislodgement of multiple-size sand grains over time
695 *M. A. Rice, B. B. Willetts and I. K. McEwan.* An experimental study of multiple grain-size ejecta produced by collisions of saltating grains with a flat bed
DISCUSSION/REPLY
707 *Gerald M. Friedman.* Early submarine cementation in fore-reef carbonate sediments, Barbados, West Indies
Niels Stentoft. Reply
709 Forthcoming papers

NUMBER 5

711 *George R. Dix.* Origin of anhedral Sr-rich calcite in deep-water mixed sediment, north-east Australia
725 *Marie Hélèn Ruz and Michel Allard.* Sedimentary structures of cold-climate coastal dunes, Eastern Hudson Bay, Canada
735 *Douglass I. Benn.* Fabric signature of subglacial till deformation, Breidamerkurjökull, Iceland
749 *S. Morad, I. S. Al-Aasm, F. J. Longstaffe, M. Marfill, L. F. De Ros, H. Johansen and M. Marzo.* Diagenesis of a mixed siliciclastic/evaporitic sequence of the Middle Muschelkalk (Middle Triassic), the Catalan Coastal Range, NE Spain
769 *Ivan Sondi, Mladen Juračić and Velimir Pravdic.* Sedimentation in a disequilibrium river-dominated estuary: the Rasa River Estuary (Adriatic Sea, Croatia)
783 *Salvatore Critelli and Raymond V. Ingersoll.* Interpretation of neovolcanic versus palaeovolcanic sand grains: an example from Miocene deep-marine sandstone of the Topanga Group (Southern California)
805 *Jay L. Banner.* Application of the trace element and isotope geochemistry of strontium to studies of carbonate diagenesis
DISCUSSION/REPLY
825 *V. P. Wright.* Carbonate ramp depositional systems from a late Jurassic epeiric platform (Iberian Basin, Spain): a combined computer modelling and outcrop analysis
Marc Aurell, Dan Bosence and Dave Williams. Reply
829 Forthcoming papers

NUMBER 6

831 *M. I. Bursik.* Theory of the sedimentation of suspended particles from fluvial plumes
839 *John S. Bridge, Jan Alexander, Richard E. Ll Collier, Rob L. Gawthorpe and Jack Jarvis.* Ground-penetrating radar and coring used to study the large-scale structure of point-bar deposits in three dimensions
853 *Steve Moss and Maurice E. Tucker.* Diagenesis of Barremian–Aptian platform carbonates (the Urgonian Limestone Formation of SE France): near-surface and shallow-burial diagenesis
875 *N. R. Winspear and K. Pye.* Sand supply to the Algodones dunefield, south-eastern California, USA
893 *Agustín Martín-Algarra and Antonio Sánchez-Navas.* Phosphate stromatolites from condensed cephalopod limestones, Upper Jurassic, Southern Spain
921 *G. Steinitz, Y. Kapusta, A. Sandler and P. Kotlarsky.* Sedimentary K–Ar signatures in clay fractions from Mesozoic marine shelf environments in Israel
935 *Zhenhua Jiang.* The motion of sediment–water mixtures during intense bedload transport: computer simulations
947 *H.-J. Engelhardt and O. Brockamp.* Biodegradation of clay minerals: laboratory experiments and results from Wadden Sea tidal flat sediments
DISCUSSIONS/REPLIES
957 *J. M. Molina, P. A. Ruiz-Ortiz and J. A. Vera/A. Martín-Algarra and J. A. Vera.* Neptunian dykes and associated features in southern Spain: mechanics of formation and tectonic implications
E. L. Winterer and M. Sarti. Replies
